PREFACE

THIS INDEX has been prepared by Mr. C. G. TOOGOOD under my supervision. Two years ago I wished to analyse all the actions of the Great War, both those between Fleets and those between two or more ships, with the view of arriving at some conclusion as to the influence of size on the results of these actions. Had an index to James' 'Naval History' been in existence much trouble would have been saved. I have great pleasure in presenting this Index to the Navy Records Society, and trust that it will be of service to other labourers in the same field.
